

Keeping Your Home Free From Pests

Together we can help keep your home and neighbourhood free from pests.

You can help by:

- Managing everyday household pests (*flying insects, ants, beetles, silverfish, spiders*).
- Keeping your home clean and your outdoor space tidy and free from rubbish.
- Storing food in sealed containers, without any waste left out overnight.
- Keeping household bins closed and emptied regularly.
- Putting rubbish in the correct bins.

Report it...

If you have a pest problem, holes or gaps at home, including damaged vents, report it to us as soon as possible.

We work with qualified and accredited pest control specialists who can treat significant pest infestations safely and effectively.

info@jigsawhomes.org.uk

Jigsaw can help by:

- Repairing structural defects that allow pests to enter (*holes in brickwork, broken vents*).
- Dealing with infestations caused by the condition of the property.
- Treating certain pest issues in communal areas of flats or blocks.
- Providing repairs to prevent recurring issues.
